WHAT OTHERS ARE SAYING ABOUT ETFILE

"etfile lets us do the scanning on the front-end which saves valuable time and money. Also, etfile was the only document management vendor that we talked to that was willing to tailor the product to fit what we were looking for. etfile has displayed an ongoing personal commitment, even at the executive management level, to listen to our needs and make sure we're getting the best results possible."

DonnaSmith, Director of Accounting Services
The Horton Group

"Since installing etfile we have scanned all our folders and now our support team has all that data on their desktop. We have had a marked improvement in the handling of our support calls just due to the etfile system. In the new year we anticipate taking back all that space the file cabinets were taking up."

Michael Esposito, President & CEO
Auto/Mate Dealership Systems
